

The smurfs token team believes in its project and is convinced that credibility, marketing, and community voting to manage the project lead to success in word and deed.

In honor of smurfs and our fun childhood we have create a crypto token by the name smurfs token it's symbol SST.

**Second,to create an API that will increase
functionality for developers,so they can integrate
it**

**with their systems and make the payment process
simple. third, to develop a B2E game by
the name blueberry through collecting
blueberries.Lastly,NFT market is to buy and sell
smurfs nft and develop it.**

**Will be renounce contract ownership after launch
to ensure trust and credibility.**

we are dealing with international hyperlink info system company that guarantees high security specially that this game is mining one, and you can read the agreement from the site.

we develop blueberry game with buy to earn (B2E) system,it's simple and obvious.(Mining) it's idea ,who own NFt smurf will get daily reward without doing any effort but according to smurf ability and specifications, it's source of earning money all what you have to do is to buy NFT and you will watch the smurf inside the game collecting it by itself.When you reach a specific limit automatically BB will be converted to SST and deposited in your wallet and BB burns out.

you can buy, sell or upgrade it by buying accessories as hat,basket,shoes from the smurfs market NFT, which increase mining hours

It will be launched with the game, with marketing campaign in all communities, to get fixed currency and link between SST

and BB to have best success. 60% from NFT sellings will be burn out , 30% for listing cex and 10% from team.The application will be available in appstore and playstore.

***Max supply 1 billion**

- Tokens marketing 100 M vesting 8% every 10 days to ensure strong marketing word and deed for 4 months, it will start two months before the game and two months after it. and we have permanent marketing from the tax, with the launch of the project to have various opportunities to attract investors and increase community constantly.**

- Tokens game 200 M for mining not for supply.
- Tokens CEX 100 M it will be for the liquidity of the platforms not for supply , we will be listing on major CEX in Q2 2024, in conjunction with the bull run.
- * Presale Investors will gain there tokens in periodic stages for stabilize token price and our future vision.
- Vesting is 40% as first and after every 10 days it will be 10%

*** Be sure that smurfs token team has faith in his project and will struggle to reach to success.**

- To ensure success of the project you have to know that the team is clear and obvious and close to the community, also you can communicate with us any time to get answers about any question you have.

After collecting the game expenses developing tax will be converted to team management social media.
